-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ONE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.

## DETAILED ACTION

Claims **47-84** are pending for examination.

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group **1**, claims **47-59** are drawn to a method comprising the steps of “polarizing a HMC layer with a first majority M-ESP”, “depositing an energy gap”, and “depositing a low LMC layer”;

Group **2**, claims **60-67, 85-91** are drawn to a method comprising the steps of “injecting a flow of spin-polarized electrons via an energy gap”, “accumulating said spin-polarized electrons, from said injecting, in a LMC layer having a majority M-ESP anti-parallel to said spin-polarized electrons”, and “flipping said M-ESP of said LMC layer to be parallel with said spin-polarized electrons due to said accumulating”;

Group **3**, claims **68-71** are drawn to an apparatus comprising a magnetic layer of material having a M-ESP and a magnetic-mirror layer of material (MM) having an ESP, wherein said MM to substantially allow electrons having an ESP parallel to said ESP of said MM to pass through said MM and to substantially prevent electrons having an ESP anti-parallel to said to said ESP of said MM from passing through said MM and said MM to cause an accumulation to the anti-parallel electrons to effect said M-ESP of said magnetic layer of material;

Group 4, claims **72-84** are drawn to an energy gap apparatus comprising a first magnetic mirror (MM), a second magnetic mirror (MM), and a conductive layer of material disposed between said first MM and said second MM to magnetically decouple said first MM from said second MM.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, \*no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2818

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q Nguyen whose telephone number is (571) 272-1788. The examiner can normally be reached on 7am-6pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (703) 308-4910. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
